GENEALOGY COLLECTION

THE  
Connecticut  
REGISTER,

FOR THE YEAR OF OUR LORD

1811 :

BEING THE THIRTY-FIFTH OF THE  
INDEPENDENCE OF THE UNITED  
STATES.

NEW-LONDON :  
PRINTED BY SAMUEL GREEN.

**T**HE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

*R U L E.*

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day ; and double the time of the sun's rising will be the length of the night.

# ECLIPSES IN THE YEAR 1811.

**T**HERE will be four Eclipses this year, two of the Sun, and two of the Moon, in the following order, viz.

I. The first will be of the Moon, March 10th in the morning, visible ; by calculation as follows :

	<i>h.</i>	<i>m.</i>
Beginning, - - -	0	23
Ecliptic opposition, - - -	1	31
Middle of the Eclipse, - -	1	40
The Eclipse ends, - - -	2	57
Duration, - - -	2	34

Digits eclipsed  $5\frac{1}{2}$  on the Moon's north limb.

II. The second will be of the Sun, March 24th ; the conjunction will be at 9h. 25m. in the morning, but it will be invisible to us by reason of the Moon's south latitude. The center of the penumbra or dark shadow of the Moon, will pass over the great Southern Ocean, where the Sun will be totally elipsed on the meridian, in latitude  $39^{\circ} 35' S.$  and longitude  $26^{\circ} 10' W.$

III. The third will be of the Moon, September 2d, in the evening ; the latter part only will be seen by us.

The middle of the Eclipse will be at 5h. 55m.

The Moon will rise 6h. 28m.

About 5 digits eclipsed on the Moon's southern limb.

The Eclipse will end at 7h. 13m.

Duration of visibility 45 minutes.

IV. The fourth will be a great Eclipse of the Sun, September 17th, in the afternoon, visible (if the air be clear) by calculation and orthographic projection as follows—viz.

	<i>h.</i>	<i>m.</i>

Middle, - - - - -	2	38	
End of the Eclipse, - - - - -	4	6	

Whole duration 2h. 9m. Quantity of greatest obscuration  $10\frac{1}{2}$  digits on the Sun's southern limb.

Apparent semi-diameter of the Sun's disk 54 0  
Moon's hourly motion from the Sun - - - - 27 10

Moon's apparent semi-diameter augmented, 14 56  
 The Sun's apparent semi-diameter, - - - 15 57  
 The semi-diameter of the penumbra, - - - 30 53  
 Moon's latitude at the conjunction, - - - 36 50 N.  
 This eclipse, at Washington City, Alexandria, and  
 Richmond, in Virginia, and several other places in the  
 southern States, will exhibit a curious appearance; a  
 bright ring of solar light will appear round the dark  
 body of the Moon, resembling a splendid gold ring.

*Sketch of the History and Geography of  
Connecticut.*

CONNECTICUT is 100 miles long, and 72 broad. Between  $41^{\circ}$  and  $42^{\circ} 2'$  N. latitude ; and between  $72^{\circ} 49'$  and  $74^{\circ} 11'$  W. longitude from London ; and between  $1^{\circ} 50'$  and  $3^{\circ} 20'$  E. of Philadelphia.

The Colony of Connecticut was settled by the English, in 1635 ; by Mr. Fenwick, at Saybrook, near the mouth of Connecticut River. Connecticut and New-Haven were separate governments till the reign of Charles II. in 1665, when by agreement they

united, and were incorporated by the name of the Governor and Company of Connecticut. The Charter by which they were united still continues to be the basis of their government.

The State of Connecticut has made rapid progress in improvement, both in wealth and civilization. No other State has continued for so many years in one uniform system of steady habits and correct principles. To the influence of her clergy of various denominations, who are a useful and respectable class of men; and to the general diffusion of knowledge, Connecticut owes, in a great measure, her respectability for order and regularity. Her government from the beginning to the present time, has been uniformly an elective democracy, or in other words, a pure system of Republicanism; and her citizens have ever been jealous of the rights and privileges which they enjoy.

She has been highly distinguished in having a succession of Governors, eminent both for their religious and political accomplishments; a list of whom here follows:

<i>Access.</i>	<i>Governor's Names.</i>	<i>Exitus.</i>
1665	John Winthrop,	1670
1676	William Leet,	1680
1680	Robert Treat,	1696
1696	John Winthrop	1707
1707	Gurdon Saltonstall,	1724
1724	Joseph Talcott,	1741
1741	Jonathan Law,	1751
1751	Roger Wolcott,	1754
1754	Thomas Fitch,	1766
1766	William Pitkin,	1769
1769	Jonathan Trumbull,	1784
1784	Matthew Griswold,	1785
1785	Samuel Huntington,	1796
1796	Oliver Wolcott,	1798
1798	Jonathan Trumbull,	1807
1809	John Treadwell.

REGISTER,

FOR THE YEAR OF OUR LORD

1812:

BEING THE THIRTY-SIXTH OF THE  
INDEPENDENCE OF THE UNITED  
STATES.

NEW-LONDON :

PRINTED AND SOLD BY SAMUEL GREEN.

# OBSERVATION.

**T**HE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

*R U L E.*

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day ; and double the time of the sun's rising will be the length of the night.

# ECLIPSES IN THE YEAR 1812.

**T**HERE will be six Eclipses this year, four of the Sun, and two of the Moon, in the following order, viz.

I. The first will be of the Sun, February 12th, conjunction at 3 h. 13 m. 15 sec. afternoon, but it will be invisible to us, by reason of the moon's north latitude,

II. The second will be a total eclipse of the Moon, February 26th and 27th, visible if the air be clear.—By calculation as follows, viz.

|                                                                                                    | <i>h. m.</i> |
|----------------------------------------------------------------------------------------------------|--------------|
| Beginning of the Eclipse, 26th day, at 11 07 evening.                                              |              |
| Begins to be total, - 27th -                                                                       | 0 12         |
| Middle of the Eclipse, - - -                                                                       | 1 05         |
| Total darkness ends, - - -                                                                         | 1 57         |
| End, and full recovery of light, -                                                                 | 3 03         |
| Duration of total darkness, - -                                                                    | 1 45         |
| Whole duration of Eclipse, -                                                                       | 3 56         |
| Quantity of greatest immersion, $20\frac{2}{3}$ digits, from the south side of the Earth's shadow. |              |

III. The third will be of the Sun, March 13th ; conjunction at 1h. 35m. 30sec. in the morning, invisible. Moon's long.  $\propto 22^{\circ} 34'$ —Moon's lat.  $1^{\circ} 19' 40''$ .

IV. The fourth will be of the Sun, August 7th ; conjunction at 0h. 8m. in the morning, invisible.—Long.  $\Omega 14^{\circ} 27'$ —Moon's lat.  $1^{\circ} 19' 30''$ .

V. The fifth will be of the Moon, August 22d ; opposition at 10h. 11m. 30 sec. in the morning, invisible.

VI. The sixth and last will be of the Sun, September 5th. The conjunction will happen at 35 min. past 2 in the afternoon ; but the Penumbra will travel rather too far to the northward, to reach the diurnal path of our vertex ; I therefore expect it will be invisible to us.

*ATABLE shewing the difference of High-Water at several places from New-London.*

**T**HE sixth column of each monthly page shews the time of High-water at New-London, New-York, Elizabethtown Point, Tarpaulin Cove, Cape-Henlopen, Cock-Spur, in Georgia, and Brunswick, in North-Carolina—to which if you add and subtract as in the annexed table, you will have the time of high-water at the following places.—(A) shews that the annexed quantities of time must be added; (S) subtracted—(H) stands for hours, (M) for minutes.

When the duties on goods imported (where the sum is payable by one person or co-partnership) shall amount to more than fifty dollars, the following credit is allowed by law, except where any bond on which the person or co-partnership entering such goods, wares or merchandize, are either principal or security, and which being due, remains undischarged.

On all articles the produce of the West-Indies, the one half in three months, and the other half in six months.

On Madeira, and other wines, in twelve months.

On all goods, &c. from Europe, (wines and teas excepted) the one third in eight, one third in ten, and one third in twelve months.

On all goods, &c. (wines and teas excepted) from any other place than Europe and the West-Indies, one half in six months, one fourth in nine months, and one fourth in twelve months.

On teas " from China or Europe, may be deposited at the option of the importer or importers (to be determined at the time of making entry thereof) either to secure the duties thereon, on the same terms and stipulations as on other goods, wares and merchandize imported, or to give his, her, or their bond, to the collector of the district where any such teas shall be landed, in double the amount of the duties thereupon, with condition for the payment of the said duties, in two years from the date of said bond : which bond shall be accepted by said collector without surety, upon the terms following : that is to say, The teas, for the duties whereof such bond shall be accepted shall be deposited at the expence and risk of the importer or importers, in one or more store house or store houses, as the case may require, to be agreed upon," &c. The said teas to be delivered upon bond being given with one or more sureties, to the satisfaction of the collector, " if the same shall not exceed 100 dollars, in four months ; if above 100 dollars, and not exceeding 500 dollars, in eight months ; or if the

same shall exceed 500 dollars, in twelve ; so that the term of credit shall not extend the period beyond two years from the time of depositing the said teas ; any teas remaining after the term of two years, to be sold by the collector, who shall return the surplus (after paying duties) to the owner or owners thereof."

When the bonds given for duties shall become due, and not discharged, the collector to prosecute without delay ; and in case of insolvency or death, the United States to be the first creditor, " and if any executor, administrator, assignee, or any other person shall pay any debt due by the person or estate for whom or for which they are acting, previous to the debt or debts due to the United States being fully satisfied and paid, shall become answerable in their *own person and estate* for the same, or part thereof remaining unsatisfied."

Sureties on all bonds given for duties, shall in case of insolvency or death of the principal, " have and enjoy the like advantages, priority or preference for the recovery and receipt of said money out of the estate and effects of such insolvent or deceased principal, as are reserved to the United States.

When bonds are prosecuted for the recovery of duties due to the United States, judgment to be granted at the return term " unless the defendant shall in open court, the United States Attorney being present, make oath or affirmation that an error hath been committed in the liquidation of the duties demanded upon such bond, specifying the errors alledged to have been committed, and that the same have been notified in writing to the collector of the said district prior to the commencement of the return term aforesaid."

On all bonds upon which suits shall be commenced, an interest shall be allowed at the rate of six per cent per annum, from the time when said bonds became due until the payment thereof.

# OBSERVATION.

**T**HE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

*R U L E.*

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting you will have the length of the day ; and double the time of the sun's rising will be the length of the night

# ECLIPSES IN THE YEAR 1813.

**T**HERE will be four Eclipses this year, two of the Sun and two of the Moon, in the following order viz. —

I. The first will be of the Sun, February 1st, at 3h, 49m. in the morning, invisible.

II. The second will be of the Moon, February 15th, in the morning, visible if the sky be clear, as follows, viz.

121699<sup>h</sup> 7<sup>m</sup>.

Beginning at 2 23

Middle 3 49

End 5 15

Duration 2h. 52m, digits eclipsed 7 and three 4ths on the Moon's southern limb.

III. The third will be of the Sun, July 27th, at 9h. 56m. in the morning, invisible to us, by reason of the Moon's south latitude. The penumbra travels in the southern Hemisphere, where, in latitude 17° 30' S. and longitude 24° 30' W. the Sun will be totally eclipsed on the meridian.

IV. The fourth and last, will be a small Eclipse of the Moon, August 11th, in the evening, visible if the air be clear.

*h. m.*

Beginning at 8 53

Middle 10 1

End 11 7

# OBSERVATION.

**T**HE hour of night is, many times, more conveniently estimated by the moon's southing, than her rising and sitting.

To find the moon's southing :

*R U L E.*

Add three hours to the time of high water on a given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting you will have the length of the day ; and double the time of the sun's rising will be the length of the night.

# STATISTICAL SKETCH

OF THE

## STATE OF CONNECTICUT.

THE Charter of CHARLES II, since the union of the two original colonies under it, has been the basis of our frame of government. The Legislature consists of two branches, viz. the Upper House and the House of Representatives. The upper house consists of the Governor, the Lieutenant Governor, and twelve Assistants. The house of representatives consists of two hundred members, inhabitants of the towns which they represent; the whole number of towns being 119, of which 81 send two representatives, and 38 one only. Connected with the government are a Treasurer, a Secretary, and Comptroller of Public Accounts. The Governor, Lieutenant Governor, Treasurer and Secretary, are chosen annually at the freemen's meeting in April, from the freemen at large. The Assistants are chosen at the same time, from a nomination of twenty persons made at the preceding freemen's meeting in October. The Comptroller is appointed by the Legislature in May annually. The Commissioner of the School Fund is appointed by the Legislature, and holds his office during their pleasure. The Overseers of New-gate are appointed in the same manner, and with the same tenure. The Auditors of the Treasurer's accounts are appointed semi-annually. The representatives are chosen twice a year at the freemen's meeting in April and September. The Speaker and Clerks of the House of Representatives are chosen at each session from their own body.

The Judicial Department consists of a Supreme Court of Errors, a Superior Court, a Court of Com-

Probate District, and an indefinite number of Justices of the Peace. The Supreme Court of Errors consists of all the Judges of the superior court, and holds two terms in a year, one at Hartford and one at New-Haven, alternately. The Superior Court consists of one Chief Judge and eight Assistant Judges, who annually, in the month of June, divide themselves into three branches; and the several counties in the state being divided into three circuits, one branch is assigned to each circuit. Each Court of Common Pleas consists of one Judge, and four Justices of the quorum. There are 30 probate districts, each having a judge.

The principal Executive Officers subordinate to the Governor, are the sheriffs, of which there is one to each county. They are appointed by the Governor and Council, and hold their offices during the pleasure of that body. Sheriffs appoint their respective deputies, with the approbation of the county court.

Military commissioned officers above the rank of captain, are appointed by the Legislature. Company officers are chosen by their respective companies, and established by the Legislature. The officers of the *State Corps*, however, are appointed by the Governor, with the consent and advice of the Council; and the officers of the *Volunteer Corps* are appointed by the governor alone.

Commissioners on turnpike roads, and commissioners of sewers are appointed by the Governor and Council. Notaries Public are appointed by the Governor alone.

Mayors of cities are chosen by the freemen of their respective cities, and hold their offices during the pleasure of the General Assembly.

Senators in Congress are appointed by the Legislature. Representatives are chosen by the freemen once in two years, at their meeting in September, from a nomination of 18 persons made at the preceding freemen's meeting in April.

## PHI BETA KAPPA.

The *Phi Beta Kappa* Society was founded at the University of Oxford in England. It was established in America, at the College of William and Mary in Virginia, on the 6th day of December 1776. A branch was instituted at Yale College, in January, 1780 ; at Harvard College, in July 1781 ; and at Dartmouth College, in 1787. These branches are distinguished by the names of the *Alpha of Connecticut*, the *Alpha*

*Massachusetts, and the Alpha of New-Hampshire.* The branch in Virginia having become extinct, the three New-England *Alphas* are the only ones at present in America. No charter can be granted unless by the unanimous approbation of all the branches.

The objects of the Institution are to promote friendship and science among its members; and to excite emulation among the candidates for admission. Its influence upon the seminaries where it is established, has been eminently happy. No college honors more anxiously sought for than an admission into the *Phi Beta Kappa*.

NEW-LONDON :  
PRINTED AND SOLD BY SAMUEL GREEN.

**T**HE hour of night is, many times, more conveniently estimated by the moon's southing, than by her rising and sitting.

To find the moon's southing :

*R U L E.*

Add three hours to the time of high water on any given day, as it is inserted in this almanack, and you will have the true time of the moon's southing for that day.

N. B. If you double the time of the sun's setting, you will have the length of the day ; and double the time of the sun's rising will be the length of the night.

Women (in the proportion of 1 to every 17 men) a ration in kind, also to matrons and nurses allowed in hospitals.

NOTE.—Though *forage* may be allowed for the number of horses noted, yet *money in lieu thereof* cannot. A distinction should therefore be drawn, say *forage-money* for one horse only, to all those of the staff, who have not been entitled, heretofore, to more than ten dollars per month.—The brigade major, aid to a brigadier, and adjutant, are expressly limited to that. The allowance of forage in kind, hay, oats, and corn, may be made to as many horses in actual service as the War Department directs.

*Resolutions passed at the semi-annual meeting, held at  
New-Haven, October 20, 1814.*

WHEREAS the measures recently adopted to prevent the profanation of the Sabbath, by travelling for secular business and needless recreations, have, in some instances been less successful than was desired and expected, because undertaken by only a few individuals, located at such distances from each other as to afford no mutual assistance. And, whereas, for the suppression of this evil, an *universal effort* seems indispensable, that the towns may afford each other that mutual aid which experience proves necessary:—Therefore,

*Resolved,* That this Society respectfully, and very earnestly request the civil and executive authority in every town to unite in persevering exertions to prevent the violation of the laws in support of the Sabbath: *Also,*

*Resolved,* To request the Branch Societies throughout the state, to pledge themselves to afford the civil and executive authority every requisite aid, in securing that observance of the sabbath which the laws demand, for the welfare of community.

The Rev. Samuel P. Williams was appointed to deliver the Sermon at the next semi annual meeting; and in case of his failure, the Rev. Aaron Dutton to supply his place.

### PHI BETA KAPPA.

The *Phi Beta Kappa* Society was founded at the University of Oxford in England. It was established in America, at the College of William and Mary in Virginia, on the 6th day of December 1776. A branch was instituted at Yale College in January, 1780; at Harvard College in July, 1781; and at Dartmouth College, in 1787. These branches are distinguished by the names of the *Alpha of Connecticut*, the *Alpha of Massachusetts*, and the *Alpha of New-Hampshire*. The branch in Virginia having become extinct, the three New-England *Alphas* are the only ones at present in America. No charter can be granted unless by the unanimous approbation of all the branches.

The objects of the Institution are to promote friendship and science among its members; and to excite emulation among the candidates for admission. Its influence upon the seminaries where it is established, has been eminently happy. No college honor is more anxiously sought for than an admission into the *Phi Beta Kappa*.
